Dear Customers

More clients are calling for the deep clean service or have increased the regularity of their service. On the other hand, some clients have suspended cleaning schedules for fear of letting anyone in their homes/offices who may have come in contact with someone infected with Covid-19.

We're trying to keep this virus out of your buildings and homes and keep you safe! Those are our measurements in order to achieve this very important goal:

- We strictly follow the recommendations and current amendments of the BAG (Swiss Federal Council / Federal Government Measures) and implement them immediately.
- Our people are getting extra training to face the pandemic.
- Our teams wear disposable gloves when cleaning and disinfection surfaces and the gloves are discarded after each assignment.
- Door handles, light switches and toilets are treated accordingly on a permanent basis.
- In case you require more/further objects to be treated, please just let us know.
- We use the best desinfectant, actually available on the market, that is destroying germs and viruses to 100%.
- Every member of our teams, working at your place, is traceably healthy.

Thank you for having placed your trust in us!
